

Are there any good capacitor brands?

There are many good capacitor brands. Not in particular order.. I personally prefer Rubycon but for reasons of availability do sometimes use Panasonic/nichicon. There are also many other ok brands but i prefer the above.

Re: Capacitor brands? Don't ever buy capacitors from China. Especially top brands from the post above.

Where can I buy a capacitor?

Capacitors seem to be one of those things that is counterfeited a lot, so definitely want to buy from good sources like Digikey, Mouser etc. Avoid Ebay, Aliexpress, Amazon etc as you don't know what you're getting. Re: Capacitor brands? Vishay and Kemet are not "premium" grade electrolytic manufacturers.

Are Japanese capacitors better than Chinese capacitors?

Japanese capacitors are notoriously known by their above-the-average quality(good electrolyte and good sealing),while Chinese capacitors have the bad reputation of using cheap electrolyte and cheap sealing,what can lead to the problems we explained. Solid capacitors are also immune to the above problems as they provide the best possible sealing.

Are all electrolytic capacitors made equally?

[nextpage title="Introduction"]Not all electrolytic capacitors are manufactured equally. Japanese and solid caps have better quality,protecting your equipment from the infamous capacitor leakage problem and also increasing the life-span of your equipment,especially if it works at high temperatures,like it is the case with power supplies.

Should I buy capacitors from China?

Don't ever buy capacitors from China. Especially top brands from the post above. In addition to those there are: Vishay and Kemet are not "premium" grade electrolytic manufacturers. Kemet makes fine poly's and Vishay makes fine ceramic caps. I would not recommend either as first choice for Electrolytics.

Are there any Japanese manufacturers of electrolytic capacitors?

Of course there are more Japanese manufacturers around,but we are listing only the ones typically found on PC hardware parts,especially power supplies and motherboards,which are the two components where people are more concerned about the quality of electrolytic capacitors.
